

CENTRALIZED SOLUTIONS TO ENVIRONMENTAL MONITORING

Aegis Monitoring

Customized Wireless Solutions

Total coverage

With so much at risk, you need a system in place that will cover all of your environmentally sensitive areas. Aegis is the only nationally recognized monitoring system that supports multiple platforms to better fit your needs.

Stay in compliance

The days of manual tracking and recording are over. Never be out of compliance with Joint Commission Standards with the 24/7 centralized monitoring system that will cover all areas of your facility, on or off campus.

Your coverage never sleeps

Once installed and configured, the system is designed to work without user intervention. Should any of your systems fall out of range, you will immediately be notified by e-mail, SMS/text message or a call from the call center.

Additional features include:

- No *licensing fees* for additional transmitters
- Expandable to all departments
- Use your existing 802.11 (Wi-Fi) infrastructure
- Low maintenance
- Color coded real-time reporting and graphing
- Multiple campus monitoring
- NIST Certification available
- On-site and remote system

Aegis offers additional solutions to fit all types of environments.

Call an Aegis representative today for a free, no-obligation consultation or demo.

Aegis Monitoring Systems are designed to minimize the risks that facilities face with temperature and humidity controlled environments. Our expandable and easy to use wireless system is your centralized solution for monitoring and data recording.
